# 3D PANELS

**INDOOR**  
made of gypsum

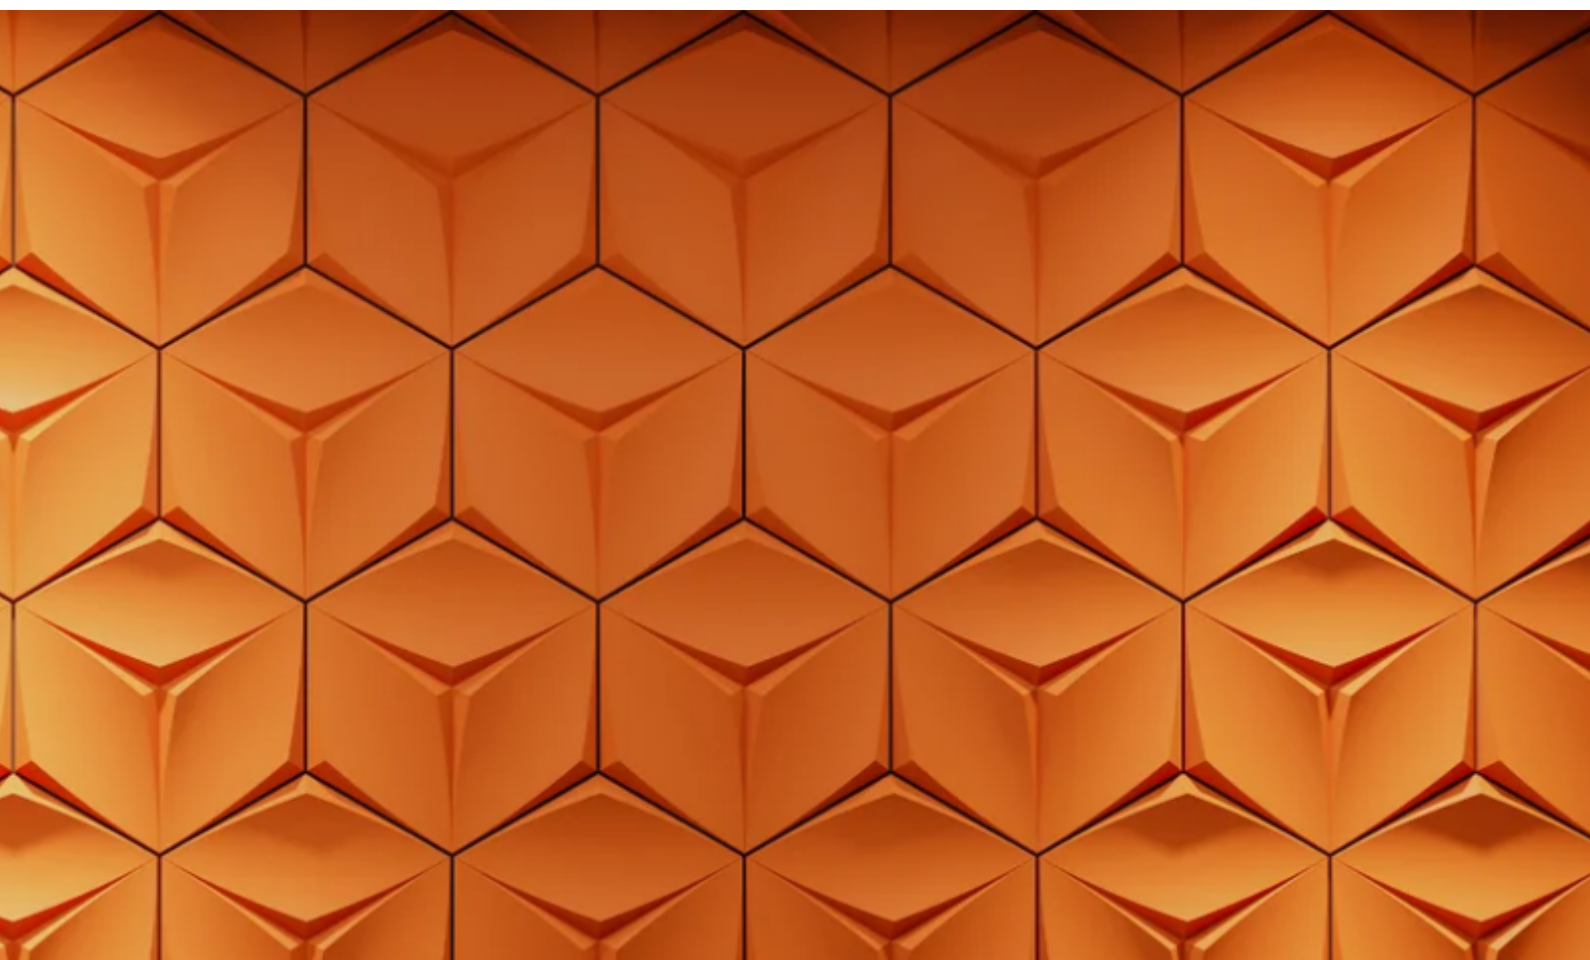

**EASY FITTING**  
paintable to any colour

**SAFE**  
fire-resistance

The 3D panels' collection allows you to create a 3D geometric feature without sanding joints, which means they are very quick and simple to install using an adhesive. 3D panels are made of natural casting plaster, an environmentally friendly and fire-resistant material. Gypsum 3D panels come in their natural colour – white but they can be painted with standard emulsion paint to any colour, after or before fitting.

# CONCRETE TILES

INDOOR / OUTDOOR  
made of concrete

PREMIUM  
dyed to order

SAFE  
fire-resistance

Concrete tiles designs can produce minimalist and industrial effects evoking a raw and modernist feel to any interior. Architectural concrete is a hard-wearing, A1 fire- and frost-resistant material that lends itself beautifully to a modernist industrial feel for both interiors and exteriors. Concrete tiles are handcrafted using GRC (Glass-fibre Reinforced Concrete) technology and made of best quality cement and fibres. They have a 4i attribution rating which is the highest in concrete products range, making it a very tough material and perfectly suited for a surface covering purposes. This versatile material can be dyed in base too many colours, from white to graphite, enabling it to be used in both domestic and commercial environments.

# STONE CLADDING

INDOOR / OUTDOOR  
made of concrete

EASY FITTING  
with tile adhesive

SAFE  
fire-resistance

Stone cladding is a fantastic decorative product, ascertically identical to natural stones and bricks. It is a strong and versatile solution popular in North America, which works well in the harshest conditions. For example, on a chimney breast, where the stones are exposed to very high temperatures or on external walls, in contact with rain, frost and sunlight.

Concrete stone cladding can be easily cut with an angle grinder and fixed with tile adhesive. Stone tiles have pre-designed corner sets, they make pillars or any other corners in your property look perfect, without joints on edge, with no need for 45 degrees cutting.

# BRICK SLIPS

INDOOR / OUTDOOR  
made of concrete

COLORFUL  
dyed in base

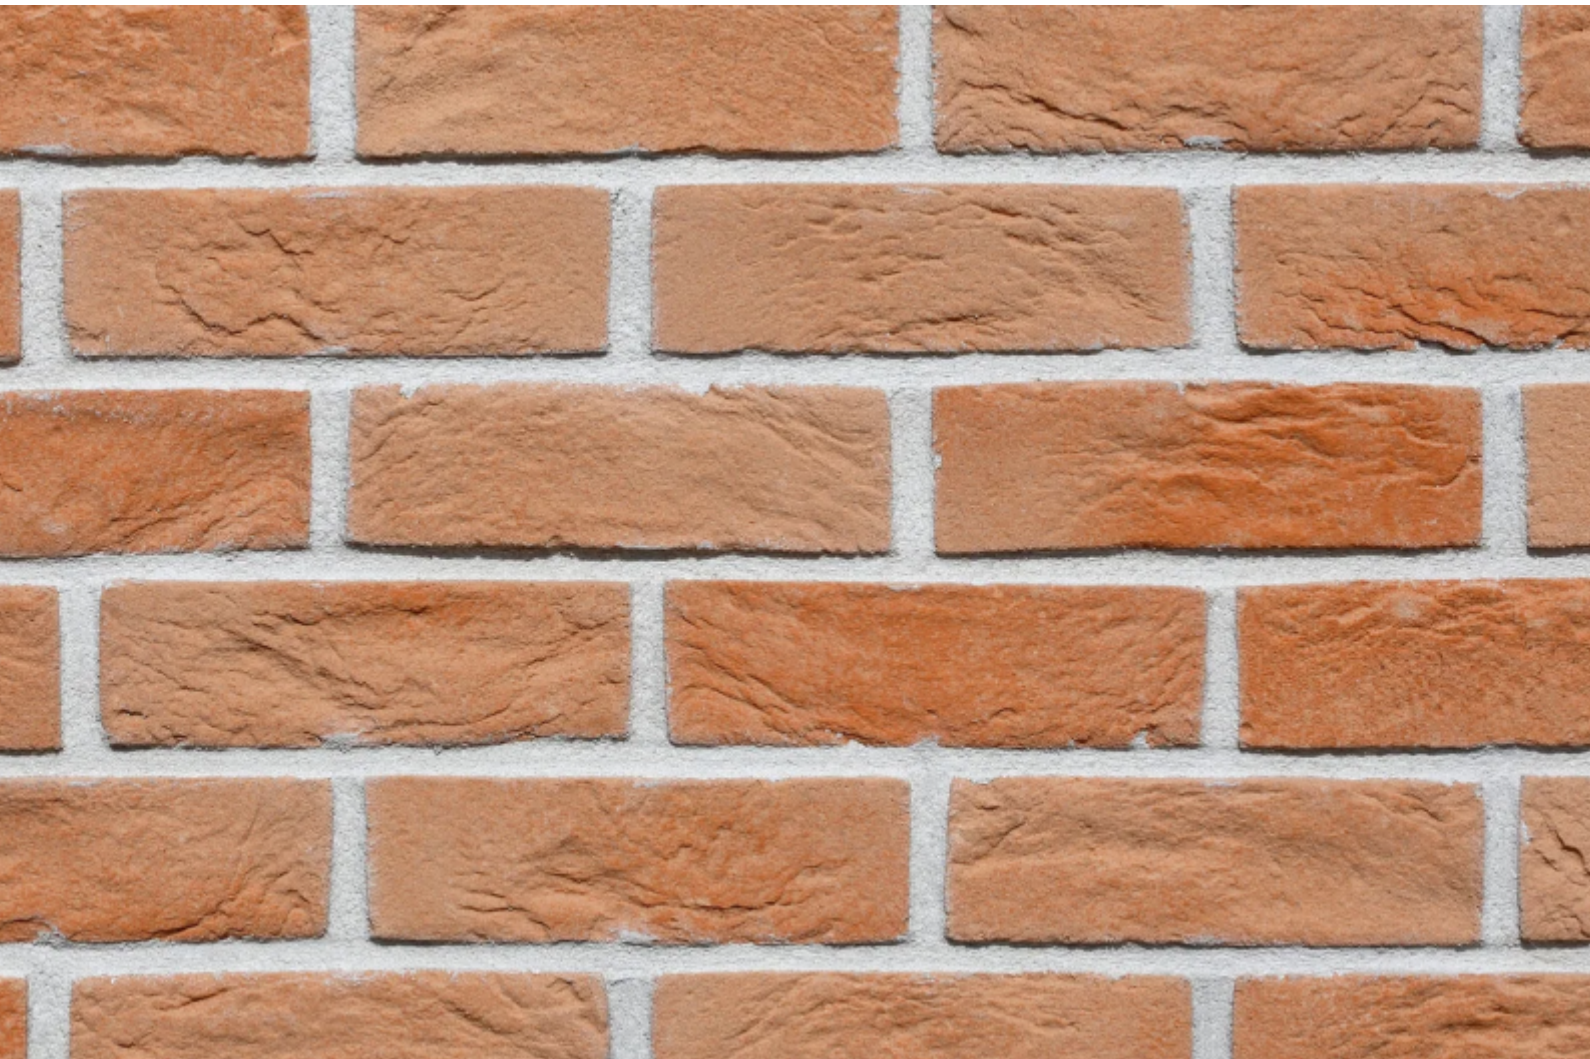

SAFE  
fire-resistance

Brick slips, expertly moulded from fire-resistance pre-cast concrete, offer a broad spectrum of utilization, both interiorly and externally. They're an exceptional choice for embellishing spaces such as bathrooms and kitchens. You can customize these slips effortlessly with a simple angle grinder, and they can be affixed using common tile adhesive. The pre-configured corner sets simplify the creation of immaculate corners and pillars, eliminating the need for complicated angle cuts.

Enhance the elegance of your living spaces with the addition of these exquisite brick tiles that offer not only functionality but also a touch of sophistication. Elevate the overall ambience of your home with a sense of refined style that is sure to make a lasting impression on all who enter. These high-quality tiles bring a sense of luxury and class to any room they adorn, creating a truly upscale atmosphere.
